$$\textcircled{2} 93 - \boxed{15} = 78$$

$$\textcircled{3} (7 \times 7) - (9 \times 5) = \boxed{4}$$
$$49 - 45$$

(16)

If one length is 30m, so is the opposite length.

If we take 60m (30m+30m) away from the perimeter (90m)

we are left with 30m. This is the two widths.

So each width is 15m.

$$\boxed{\text{Width} = 15 \text{ m}}$$
